## Extended Range Prediction for Bhutan

### Background

Extended Range Prediction (ERP) for Bhutan is prepared with the support from the Indian Meteorological Department (IMD), Government of India. The model used for the system is CFSv2 coupled model (Atmospheric and Ocean model) which runs once every week (Wednesday), with the 16 Ensemble Members at the horizontal resolution of around 25 km, and the products are made available the next day (Thursday). Therefore, the ERP products for Bhutan will be generated every Friday. ERP for Bhutan is carried out for two climate variables, rainfall and temperature.

Generally, the forecast output is produced on a weekly basis for a period of a month for both the variables. The current products available from NCHM are on pilot basis which needs further studies and validation with the ground observations until the product is fully operationalized.

## Observed weather over last week

Most of the stations across the country showed a decreasing maximum temperature and varied (increase in the middle of the week) minimum temperature throughout the week. Light rain was observed throughout the country. The table below displays observed real time rain and temperature data from regional meteorological stations over the last week.

| Station  |           | 09 May | 10 May | 11 May | 12 May | 13 May | 14 May | 15 May |
|----------|-----------|--------|--------|--------|--------|--------|--------|--------|
| Babesa   | Tmax (°C) | 20.0   | 20.0   | 18.0   | 13.0   | 18.0   | 16.0   | 16.0   |
|          | Tmin (°C) | 7.0    | 11.0   | 8.0    | 12.0   | 9.0    | 10.0   | 11.0   |
|          | Rain (mm) | 0.0    | 1.4    | 3.2    | 7.2    | 2.8    | 3.4    | 3.2    |
| Dagana   | Tmax (°C) | 23.5   | 24.5   | 24.0   | 19.0   | 22.0   | 23.0   | 22.0   |
|          | Tmin (°C) | 18.5   | 18.0   | 17.0   | 18.0   | 18.0   | 18.0   | 19.0   |
|          | Rain (mm) | 0.0    | 20.6   | 0.6    | 11.4   | 3.4    | 1.0    | 1.2    |
| Chamkhar | Tmax (°C) | 31.0   | 31.0   | 31.0   | 25.0   | 25.5   | 26.5   | 27.0   |
|          | Tmin (°C) | 15.0   | 15.0   | 19.0   | 19.0   | 19.0   | 19.5   | 19.0   |
|          | Rain (mm) | 0.0    | 2.2    | 0.6    | 0.4    | 0.6    | 2.8    | 1.6    |
| Deothang | Tmax (°C) | 27.5   | 28.0   | 24.0   | 24.0   | 21.0   | 18.0   | 17.5   |
|          | Tmin (°C) | 12.0   | 17.0   | 17.0   | 16.5   | 17.0   | 17.0   | 17.0   |
|          | Rain (mm) | 0.0    | 0.0    | 0.2    | 5.8    | 2.4    | 10.4   | 2.4    |
| Gasa     | Tmax (°C) | 34.0   | 33.5   | 33.5   | 29.0   | 31.5   | 10.4   | 29.0   |
|          | Tmin (°C) | 18.5   | 33.5   | 33.5   | 29.0   | 31.5   | 28.0   | 20.0   |
|          | Rain (mm) | 0.0    | 24.0   | 0.0    | 4.6    | 0.0    | 0.0    | 0.0    |

## Weekly forecast for Bhutan

### 1. Rainfall Prediction

#### Week 1 (08 May - 15 May)

Above normal rainfall in the eastern part and below normal in the western part of the country.

#### Week 2 (15 May - 22 May) Week 3 (22 May - 29 May)

Below normal rainfall throughout the country.

#### Week 3 (22 May - 29 May)

Below normal rainfall throughout the country except above normal in the north.

#### Week 4 (29 May - 05 June)

Above normal rainfall throughout the country.

THIMPHU: BHUTAN

*"Centre of Excellence in Hydrology, Meteorology and Cryosphere Science and Services"*

## 2. Maximum Temperature Prediction

### Week 1 (09 May - 15 May)

Normal maximum temperature throughout the region except above normal in the south.

### Week 2 (16 May - 22 May)

Normal maximum temperature throughout the region.

### Week 3 (23 May - 29 May)

Normal maximum temperature throughout the region except above normal in the south.

### Week 4 (30 May - 05 June)

Normal maximum temperature throughout the region.

### 3. Minimum Temperature Prediction

#### Week 1 (09 May - 15 May)

Above normal minimum temperature throughout the region.

#### Week 2 (16 May - 22 May) and Week 3 (23 May - 29 May)

Normal minimum temperature throughout the region except for above in the scattered part in the south.

#### Week 4 (30 May - 05 June)

Normal minimum temperature throughout the region.

*"Centre of Excellence in Hydrology, Meteorology and Cryosphere Science and Services"*

## Summary

- The rainfall is likely to be below normal in the west and above normal in the east for week one and gradually turn to above normal by week 4.
- The maximum temperature is likely to be normal for the rest of the month except it is above normal in the south in the first and third week.
- The minimum temperature is likely to be above normal for the first week and gradually become normal for the rest of the month.

Note\* Due to the failure of the model, the latest update is still from last week.

## Classification of rainfall for 24 Hours

|                          |                             |
|--------------------------|-----------------------------|
| No rainfall              | 0.0 mm                      |
| Very light rainfall      | 0.1 to 0.9 mm               |
| Light rainfall           | 1.0 to 10.0 mm              |
| Moderate rainfall        | 11.0 to 30.0 mm             |
| Heavy rainfall           | 31.0 to 70.0 mm             |
| Very heavy rainfall      | 71.0 to 150.0 mm            |
| Extremely heavy rainfall | Equal or more than 151.0 mm |
